

High Water Mark (HWM) shown on the current OSI 1:5,000 vector mapping series. This line is used as HWM for the 2010 CAO mapping.

High Water Mark (HWM) shown on the OSI 1:5,000 vector series mapping (revised in 2000). The red line does not extend further north. Therefore for the 2009 CAO mapping the HWM north of the red line was shown aligned with OSI 6 inch raster mapping and the Aerial Survey.
