The proposed onshore pipeline is approximately 9.2km long, comprising part of a longer strategic upstream pipeline system for the carrying of natural gas, and associated by-products, from the existing Corrib Gas Field (grid ref. 54° 20.34'N, 11° 03.51'W), to the gas terminal at Béal an Átha Buí (Bellanaboy Bridge), Co. Mayo, previously Permitted under Planning Ref. P03/3343 (An Bord Pleanála Appeal Ref. PL 16.207212). The proposed pipeline system comprises the onshore gas pipeline itself, associated services umbilicals and other essential cabling, and an outfall discharge pipeline extending from the gas terminal to a location some 12.7 km offshore. The proposed pipeline extends from a landfall point in the townland of Gleann an Ghad (Glengad or Dooncarton), Co. Mayo (grid ref. 81469.0E, 338690.0N), in a generally easterly direction across Sruwaddacon Bay, and across land in the vicinity of the settlement of Ros Dumhach (Rossport / Rossdoagh), before re-crossing Sruwaddacon Bay, and running east and south in the townlands of Na hEachú (Aghoos) and Béal an Ghoille Theas (Bellagelly South), into the Bellanaboy Bridge Gas Terminal. It is proposed to lay the pipeline within a corridor of a general width between 40m and 100m. The permanent wayleave of the pipeline will be of between 14m and 20m width. The working width during the construction phase will typically be 40m. The proposed development will result in the removal from use of two houses within the settlement of Ros Dumhach (Rossport / Rossdoagh) for the duration of operation of the pipeline.

The proposed development includes an above-ground Landfall Valve Installation (LVI), including an associated surface water outfall system, located in the townland of Gleann an Ghad (Glengad or Dooncarton), and the permanent use of, and associated upgrading of, an existing access road from the L1202 public road to the site of the proposed LVI. The LVI is designed to limit the pressure in the onshore pipeline to 144bar or less. The proposal also includes all associated temporary and permanent construction, site development and landscaping works, including the provision of temporary site construction compounds, and including the temporary use of the existing construction compound and internal access roads within the terminal site, and the use of existing access points from the Terminal site onto the public road network previously Permitted under Planning Ref. P03/3343 (An Bord Pleanála Appeal Ref. PL 16.207212).

Temporary vehicular access to the pipeline corridor will be taken from the public road network, including at points where the corridor crosses public roads. The proposed development will cross public roads at 4 no. locations – 3 no. in the townland of Ros Dumhach (Rossport / Rossdoagh), and 1 no. in the townland of Béal an Ghoille Theas (Bellagelly South). It is proposed to carry out minor road improvements at the junction of the L-52453-0 and L-52453-25 in the townland of Rossport to facilitate construction traffic.

The proposal includes the importation and deposition of up to 75,000 cubic metres of peat, to be excavated from the route of the proposed onshore pipeline, into and within the existing Bord na Móna peat deposition site in the townlands of Srahmore and Attavally, Bangor-Erris, County Mayo (the 'Srahmore' site), previously Permitted under Planning Ref. P03/3343 (An Bord Pleanála Appeal Ref. PL 16.207212). The proposal includes all associated temporary and permanent site works, infrastructure,
